

Removing a billing manager from your organization

If a person with the *billing manager* role no longer needs to view or change your organization's billing information, you can remove their access to the organization.

Note: Only organization members with the *owner* or *billing manager* role can access or change billing settings for your organization.

In the top right corner of GitHub, click your profile photo, then click **Your profile**.

On the left side of your profile page, under "Organizations", click the icon for your organization.

In your organization's Settings sidebar, click **Billing**.

In the Billing managers list, next to the name of the person you want to remove, click ✕.
